Instatube

Product information "Instatube"

LED tube

Litegears® Instatube Series is a waterproof LED luminaire similar like a LED tube. It can be used in many kind of applications such as cold store, farms, green house, industry, warehouse, outside applications and moblie as worklight. The aluminum housing is protected against water and dust with an additional clear plastic cover. Due to waterproof connectors and cables it has a very quick and easy installtion method.

Litegear® Instatube has a very good price to performance ratio compared to other waterproof fixtures. With the mounting clips it can be used as a pendant light or be clipped on a steel wire to make an easy light line. Instatube from Litegear® can be offered in differnent lengths. One of the biggest advantages for LED lights is their lower power consumption and long lifespan. The Litegear® Instatube has full light output after been switched on and cotains no toxic material such as mercury. The housing is very robust and strong and LED is protected against heavy vibrations, dust and liquids. Litegear® light up your dreams!
