

# Fenestra Rectangle Eco Line 6030 40-840-2950LM

## Product information "Fenestra Rectangle Eco Line 6030 40-840-2950LM"

### LED Panel

The Litegear® Fenestra Rectangle Eco Line LED panels are made to be installed in to ceilings or to be hung on walls or ceilings. They have a low power consumption and a long lifespan. With optional hanging kits (a set contains 4 steel wires) the panel can be palced over desks or work areas. The LED light has no IR wavelength hence, so that you will feel no heat immision on your skin. Our LED panels give you the imagination of a sky window with naturally light flooded rooms. Litegear Fenestra LED panels are perfect for use with computer screens because the almost give no reflections. A Fenestra Rectangle Eco can replace a recessed ceiling light with flourescent tubes and can save around 50% energy costs.

The Litegear LED Panels are available in different dimensions and color temperatures. They look really stylish and have a smooth light output. We offer 24V DC power supplies in different versions in our webshop. We offer the Fenestra panels also in round and rectangular version.

## Technical Details:

|                             |                   |
|-----------------------------|-------------------|
| Luminous Flux               | 2950 lm           |
| Light Yield:                | 74 lm/W           |
| Light Temperature:          | 4000 K            |
| Color Rendering Index (CRI) | ≥85 Ra            |
| Power Consumption:          | 40 W              |
| Operating Hours:            | >30.000 h L70/B50 |
| Switching Cycles:           | >25.000           |
| Ignition Time:              | <1 s              |
| Ambient Temperature (TA):   | -20°C - 45°C      |
| Housing Material:           | aluminum          |
| Housing Color               | white             |
| Coating:                    | lacquered         |
| Dimensions                  | 620x310x12 mm     |
| Net Weight:                 | 3400 g            |
| Warranty                    | 2 years           |
