Planeta Reflektor 60

Product information "Planeta Reflektor 60"

LED High Bay

Litegear® Planeta Advance High Bay is based on a high-quality aluminium housing and cold forging heatsink. Perfect for industrial applications in warehouse, production plants and shopping center. Planeta Advance can be used outdoor, in cool house or in dusty enviroment. Planeta Advance is energy- and maintenace saving because of low heat emmision and long lifespan LED technology. This series is suitable to replace discharge luminaires from 250 to 400W HQI based. Due to long lifespan no bulb replacement needed. Planeta Advance is an open luminaire system where the light source can be combined with optional aluminum and acrylic reflectors. To reduce the glare the LED chips are covered by a milky diffusor. In the Litegear® Planeta Advance Series we only use top quality driver and high class LED chips.

Technical Details:

Housing Material:	plastic
Dimensions	417x274 mm
Net Weight:	1047 g
