

Element POWERMANAGER MONO DIM MKII

Product information "Element POWERMANAGER MONO DIM MKII"

CONTROLS / ELEMENT SERIES

For comfortable control of LED strips and low-voltage lights, we offer various systems. You can choose between wireless, Wifi or DMX connection and benefit from the respective advantages.

POWERMANAGER MONO DIM MKII

The Litegear Element Controller is a 1-channel dimmer module. The controller can be controlled via a suitable remote control or via cable by the push dim function. The LG5433 is suitable for dimming LED strips and low-voltage LED lamps. It is easy to connect the suitable remote control through the "Sync button". The Converter requires an external power supply

Technical Details:

Power Consumption:	288 W
Ambient Temperature (TA):	-20°C - 40°C
Housing Material:	plastic
Housing Color	white
Zones:	1
Channels:	1
Dimming:	1-100%
Transmission Frequency:	433/868MHz
Dimensions	95x37x23 mm
Net Weight:	48 g
Warranty	2 years
