

# Copula 10-830-680LM

## Product information "Copula 10-830-680LM"

### Pendant luminaire

Copula is a elegant LED pendant light made from aluminum. The LED driver is integrated in the canopy housing which can be fixed to the ceiling. The luminaire housing and the canopy are connected with a 1m pendant cable. Litegear® Copula is suitable as pendent light over desks, counters or tables in living rooms or restaurants. In the middle of the aluminum housing a black colored aluminum heatsink is integrated to give a nice contrast.

Copula is available on request in different light colors and in different lumen classes. Due to a reflector this lamp has a low glare and smooth light distribution.

## Technical Details:

|                             |                   |
|-----------------------------|-------------------|
| Luminous Flux               | 680 lm            |
| Light Yield:                | 68 lm/W           |
| Light Temperature:          | 3000 K            |
| Color Rendering Index (CRI) | ≥80 Ra            |
| Color Consistency (SDCM):   | 6                 |
| Power Consumption:          | 10 W              |
| Power Factor (PF):          | 0.9               |
| Operating Hours:            | >30.000 h L80/B20 |
| Switching Cycles:           | >50.000           |
| Ignition Time:              | <1 s              |
| Ambient Temperature (TA):   | -20°C - 40°C      |
| Housing Material:           | aluminum          |
| Housing Color               | white             |
| Coating:                    | lacquered         |
| Dimensions                  | 79,5x1100 mm      |
| Net Weight:                 | 774 g             |
| Warranty                    | 3 years           |
